BORROW THE MOON

Science & Technology
Facilities Council

NATIONAL
SPACE ACADEMY

Last week, children at Perry Hall had the amazing opportunity to observe, hold and explore a selection of rocks that have travelled through space!

We looked at real rock samples and lunar dust from the moon, held meteorites which had fallen to Earth from space and looked at rocks which had been created when a meteorite had struck Earth (known as impactite).

The children really enjoyed this fantastic opportunity, making and discussing their observations as they experienced these unique and remarkable samples.

Thank you to Mrs Holdcroft for arranging such a great opportunity for our children!
