15 February 2019

Dear parents,

On the week of the 11<sup>th</sup> March, Perry Hall will be celebrating Science and Technology Week throughout the school. Each class will be working to create a STEM (Science, Technology, Engineering and Maths) project in school.

To celebrate this exciting week and after the success of the previous years' events, we are holding our own STEM fair again! We are inviting children to create their own project at home which demonstrates their understanding of 'Journeys' (this year's Science Week theme). For example, children could create a hovercraft CD to demonstrate how people travel, create a diary detailing the journey taken by Scott to the Antarctic, creating a model of Apollo 11 landing on the moon to show travel through space, a time capsule to show a journey through time... the possibilities are endless! We would be very grateful if you could support your children in their project, discussing the scientific theory behind their project.

If children wish to enter, they need to bring their project, along with an explanation of the science behind their work, to class on **Monday 11<sup>th</sup> March**.

One winner will be chosen from each class and will receive a certificate. These winners will be entered into our STEM fair where our governors and members of the MAT team will be invited to select a winner from each Key Stage on **Thursday 14<sup>th</sup> March**. If your child's project is entered into our STEM fair, family members will be invited to the fair to celebrate your child's entry.

I hope you're as excited about our Science and Technology Week as we are!

Thank you for your continued support.

Miss. R. Kohli

Executive Headteacher
