

Year 2 Science Home Learning

Habitats

Can you find some things that are living, once lived and never alive in your home?

How can we tell that a car is not living? Why might someone think it is a living thing?

Is water alive? How can you tell?

Look out of your window and think about how many different animals might live in the habitats in front of your home. Would they be the same animals that live around your grandparent's home or your best friends? Or the last place you went on holiday!? Why do you think they would be different (or the same)?

Create a microhabitat for minibeasts by making a Minibeast palace:

http://www.treetoolsforschools.org.uk/activities/pdfs/pdf_minibeast_palace.pdf

Check on your palace after a week – has anyone moved in?

You could also try attracting some butterflies to your garden by making a butterfly feeder:

http://www.treetoolsforschools.org.uk/activities/pdfs/pdf_butterfly_feeder.pdf

Don't forget your Purple Mash Science To Dos too!
