# Sea Art

Summer is a great time to visit the beach. Create your own sea art with these easy to follow instructions.

You will need:
- White A4 paper
- White wax crayon
- Blue watercolour paint
- Paintbrush and water
- Sandpaper
- Silver glitter
- Glue

Instructions

1. Using the white crayon, draw lines on the paper similar to the ones in the picture above.

2. Using a mixture of watercolour paint and water, paint all away across the page. The white lines will be revealed. If you want darker blue in places, use more paint and less water.

3. Cut out a piece of sandpaper so it fits in the bottom right corner of your painting. The shape should be like this:

4. Glue the sandpaper to the painting once the paint has dried.

5. Along some of the white lines, add some glue. Sprinkle glitter on the glue and then shake off any excess glitter.

You could add other things to your picture, such as sea creatures or maybe a pair of flip-flops on the sand.
