Arithmetic

10.03.23

L.O. To solve problems using the four operations.

Me	Can I...?	Teacher
	Recognise whether I need to add, subtract, multiply or divide	
	Use the four operations to solve problems involving both whole numbers and decimals	
	Use formal, written methods to work out an answer	
Today's Score	How I feel about today's skill.	
	<div style="display: flex; justify-content: space-around;"> I've got it <input type="checkbox"/> I'm okay with it <input type="checkbox"/> I need more practise <input type="checkbox"/> </div>	

Arithmetic

Today, our arithmetic lesson will focus on using the four operations to solve mathematical problems.

The four operations are:

In the I do and We do examples, we will focus on multiplication and division, but you will see some addition and subtraction questions on your test too!

Practise!

I Do

$42 \times 12 =$ 

	H	T	O			
	4	2				
	1	2				
	8	4				
4	2	0				
5	0	4				

Step 1: $2 \times 2 = 4$
 Step 2: $2 \times 40 = 80$
 Step 3: Add the place holder
 Step 4: $2 \times 10 = 20$
 Step 5: $40 \times 10 = 400$
 Step 6: $84 + 420 = 504$

Practise!

We Do

$564 \div 3 =$

	H	T	O			
	1	8	8			
3	5	2	6	2	4	

Have a go with a grown up at home, or by yourself and check your method and answer with my calculation below!

Practise!

You Do

$122 \times 48 =$

Have a go at this question independently. Did you get the correct answer?

	Th	H	T	O		
	1	2	2			
		4	8			
	9	7	6			
4	8	8	0			
5	8	5	6			

Application

Complete the test and bring in your answers to school on Monday for your class teacher to mark!

Time to show off your skills!

#	Question	Answer	M
1	$8564 - 762$		
2	$535 \div 5$		
3	78.3×12.4		
4	67×34		
5	$16.03 - 9.32$		
6	$86 \div 4$		
7	81×63		
8	$8760 \div 1000$		
9	342×7		
10	How many ml are there in 5l?		
11	What is five cubed?		
12	9×8		

How have you done today?
